SUMMARY

Skilled in building and maintaining web apps with Django, designing RESTful APIs, and developing responsive frontends using HTML, CSS, and JavaScript. Experienced in Agile teams, backend logic, MySQL, API integration, testing, and debugging. Committed to clean code, performance optimization, and delivering user-friendly solutions.

EXPERIENCE

JAN 2025-APR 2025

Python Django and Fullstack Developer as an **Intern** at **INFOLABZ IT SERVICES PVT. LTD.**

- Developed and maintained web applications using the Python Django framework.
- Designed RESTful APIs for seamless integration with front-end applications.
- Collaborated with cross-functional teams in an Agile environment to enhance project delivery.
- Managed project timelines and deliverables, ensuring timely completion of milestones.
- Conducted code reviews and implemented best practices to improve code quality.

APR2024- JUN 2024

Frontend Developer as an **Intern** at **INFOLABZ IT SERVICES PVT. LTD.**

The role of Frontend Developer at INFOLABZ IT SERVICES PVT. LTD. Involves creating visually appealing and user-friendly web interfaces. Responsibilities include collaborating with designers to translate UI/UX designs into functional web pages, and ensuring responsiveness across various devices.

- Developed interactive web applications using HTML, CSS, and JavaScript, enhancing user engagement.
- Ensured cross-browser compatibility, and optimised applications for maximum speed and scalability.

EDUCATION

Bachelor of Technology (B.Tech) in [AI & ML] - Lateral Entry [JG UNIVERSITY]

Joined in: Second Year: August 2025

Current Year: 2nd Year (Ongoing)

Previous Qualification: Diploma in [Information technology] - [Silver Oak University], [May 2025]

KEY SKILLS

- CSS AND HTML
- FRONT-END DEVELOPMENT
- BACKEND PROGRAMMING
- JAVASCRIPT
- CLIENT COMMUNICATION
- CODE DEBUGGING
- MYSQL
- API DEVELOPMENT
- HTML AND XML
- IMPLEMENTATION PLANNING
- STRONG COMMUNICATION
- PYTHON
- TESTING
- DEBUGGING

PROJECTS

- **IOT based Smart Agricultural System**

Jan, 2025 TO Apr, 2025

The Internet of Things (IoT) has revolutionized modern agriculture by enabling smarter, data-driven farming practices. An IoT-based agriculture system leverages interconnected devices and sensors to monitor and manage various farming operations in real time. This system collects data on soil moisture, temperature, humidity, crop health, and environmental conditions, enabling farmers to make informed decisions to optimize crop yield and resource usage.

- **RFID and NFC cloning**

Sep, 2024 TO Dec, 2024

RFID cloning is a technique used by hackers to create counterfeit RFID tags that mimic the behaviour of legitimate tags. Hackers can exploit vulnerabilities in RFID systems to capture and copy the unique identification data stored on RFID tags, creating replicas that can be used to bypass security measures.

- **Gold and Silver Price Tracker**

Apr, 2024 TO Jun, 2024

The **Gold and Silver Price Tracker** is a real-time web application built using **Python Django** that displays the current market prices of precious metals like **Gold (XAU)** and **Silver (XAG)** by fetching data from a live external API. The platform offers users up-to-date price information in a simple and user-friendly interface.

- **Parking Management System**

Jan, 2024 TO Apr, 2024

- Parking Management System (PMS) is a small system that can be easily transferred from computer to computer by a servers.
- Its purpose is to solve a problem that really bothers many customers today for managing of parking slots inside a parking store.
- So it provides you a very simplistic solution of managing parking slots which provides you with making an entry of incoming and outgoing vehicles.
- Parking Management System beside managing slots also provides you with several functionalities in order to keep your database up to date.

AWARDS

- AWARDED FOR BEST PROJECT ON **RFID AND NFC CLONING PROJECT** AT **SILVER OAK UNIVERSITY PROJECT FEST**, SEP 2024 - DEC, 2024

LEADERSHIP

IoT-Based Smart Agricultural System

Team Lead | [SILVER OAK UNIVERSITY] | [Jan, 2025 TO Apr, 2025]

Led the development of an IoT-based solution for smart farming using sensors (soil moisture, water level, smoke, fire, IR) to monitor and automate agricultural processes.
